

<b>COURSE TITLE BLACKBOARD SITE</b>	MCS 3663 – Computer Architecture & Assembly language Summer 2012 – <a href="http://my.ltu.edu">http://my.ltu.edu</a> and select CRN 5455
<b>INSTRUCTOR</b>	Mohammed El-Bathy Adjunct Faculty at Math & Computer Science Department  Office hours by appointment
<b>SCHEDULE</b>	May 16, 2012 – July 26, 2012  Refer to <a href="http://www.ltu.edu/registrars_office/calendar_final_exam.index.asp">http://www.ltu.edu/registrars_office/calendar_final_exam.index.asp</a> for the last date to withdraw and other important registration related information.
<b>LEVEL/HOURS PREREQUISITE</b>	Graduate or Undergraduate Degree / 03 credit hours  <u>Admission / prerequisite requirements:</u> Undergraduate level <a href="#">MCS 2514</a> – Computer Science 2
<b>REQUIRED TEXT</b>  (See Blackboard for additional resources)	Alan Clements – Principles of Computer Hardware, Fourth Edition, Publisher: Oxford University Press, ISBN: 978-0-19-927313-3  Available for online purchase through LTU Bookstore at: <a href="http://lawrence-tech1.bkstore.com/bkstore/TextbookSelection.do?st=489">http://lawrence-tech1.bkstore.com/bkstore/TextbookSelection.do?st=489</a>
<b>ADDITIONAL RESOURCES</b>	LTU Online student resources: <a href="http://www.ltu.edu/ltuonline/">http://www.ltu.edu/ltuonline/</a>
<b>TECHNICAL SUPPORT</b>	Technical support for using Blackboard is provided by the Helpdesk, 248.204.2330 or <a href="mailto:helpdesk@ltu.edu">helpdesk@ltu.edu</a> . Send the Help Desk a form detailing any issues by clicking here <a href="http://tinyurl.com/3yqrvne">http://tinyurl.com/3yqrvne</a> .

## COURSE SCHEDULE FOR TRADITIONAL SEMESTER COURSES

This fully online course begins with a partial week online course orientation period to familiarize yourself with the online learning environment and to meet online or via the phone with your instructor. Each subsequent week starts on a Monday and ends on a Sunday.

Dates	Modules	Topics / Readings	Instructional Activities
Prior to Semester Start and May 14 – May 20	Module 0	<ul style="list-style-type: none"> <li>Online Learning Orientation</li> <li>Course Orientation</li> <li>Overview of textbook</li> </ul>	<ul style="list-style-type: none"> <li>Course orientation</li> <li>Instructor conversation</li> <li>Read Chapter one (1)</li> <li>Propose teams</li> </ul>
<u>Week of</u> May 21 – May 27	Module 1	<u>Computer Arithmetic:</u> <ul style="list-style-type: none"> <li>Bits, Bytes, &amp; Characters</li> <li>Number Bases</li> <li>Number Base Conversion</li> <li>Data-Compressing Codes</li> </ul>	<ul style="list-style-type: none"> <li>Read Chapter 4.1- 4.6</li> <li>Review Lecture Presentations</li> <li>Practice Self Review #1</li> <li>Bb Discussion #1 – <b>Start</b></li> <li>Essay <b>Out</b></li> </ul>
<u>Week of</u> May 28 – Jun 03	Module 2	<u>Computer Arithmetic:</u> <ul style="list-style-type: none"> <li>Binary Arithmetic</li> <li>Signed Numbers</li> <li>Floating Point Numbers</li> <li>Multiplication and Division</li> </ul>	<ul style="list-style-type: none"> <li>Read Chapter 4.7- 4.10</li> <li>Review Lecture Presentations</li> <li>Practice Self Review #2</li> <li>Bb Discussion #1 - <b>End</b></li> <li>HW 1 - <b>Out</b></li> </ul>
<u>Week of</u> Jun 04 – Jun 10	Module 3	<u>Instruction Set:</u> <ul style="list-style-type: none"> <li>Instruction Set Architecture</li> <li>Structure of CPU</li> <li>The 68K Family</li> <li>68K Instructions</li> </ul>	<ul style="list-style-type: none"> <li>Read Chapter 5</li> <li>Review Lecture Presentations</li> <li>Practice Self Review #3</li> <li>Bb Discussion #2 - <b>Start</b></li> <li>HW 1 - <b>Due</b></li> </ul>
<u>Week of</u> Jun 11 – Jun 17	Module 4	<u>Assembly Language Programming:</u> <ul style="list-style-type: none"> <li>68K Assembly Language</li> <li>68K Instruction Set</li> <li>Addressing Mode</li> <li>The Stack</li> <li>Examples of 68K programs</li> </ul>	<ul style="list-style-type: none"> <li>Read Chapter 6</li> <li>Review Lecture Presentations</li> <li>Practice Self Review #4</li> <li>Bb Discussion #2 - <b>End</b></li> <li>HW 2 - <b>Out</b></li> </ul>
<u>Week of</u> Jun 18 – Jun 24	Module 5	<u>Gates &amp; Circuits</u> <ul style="list-style-type: none"> <li>Analog &amp; digital systems</li> <li>Fundamental Gates</li> <li>Application of Gates</li> <li>Introduction to Digital Works</li> </ul>	<ul style="list-style-type: none"> <li>Read Chapter 2.1 - 2.4</li> <li>Review Lecture Presentations</li> <li>Practice Self Review #5</li> <li>Bb Discussion #3 – <b>Start</b></li> <li>HW 2 – <b>Due</b></li> <li>Programming Problem 1 <b>Out</b></li> </ul>
<u>Week of</u> Jun 25 – Jul 01	Module 6	<u>Combinational Logic</u> <ul style="list-style-type: none"> <li>Introduction to Digital Works</li> <li>Introduction to Boolean Algebra</li> <li>Karnaugh Maps</li> <li>Special-purpose Logic elements</li> <li>Tri-state Logic</li> <li>Programmable logic</li> </ul>	<ul style="list-style-type: none"> <li>Read Chapter 2.5 - 2.8</li> <li>Review Lecture Presentations</li> <li>Practice Self Review #6</li> <li>Bb Discussion #3 – <b>End</b></li> <li>HW 3 – <b>Out</b></li> <li>Programming Problem 1 <b>Due</b></li> </ul>

Dates	Modules	Topics / Readings	Instructional Activities
<u>Week of</u> Jul 02 – Jul 08	Module 7	<u>Sequential Logic:</u> <ul style="list-style-type: none"> <li>• RS flip-flop</li> <li>• D Flip-flop</li> <li>• Clocked flip-flop</li> </ul>	<ul style="list-style-type: none"> <li>• Read Chapter 3.1 – 3.5</li> <li>• Review Lecture Presentations</li> <li>• Practice Self Review #7</li> <li>• Bb Discussion #4 - <b>start</b></li> <li>• HW 3 – <b>Due</b></li> <li>• Programming Problem 2 <b>Out</b></li> </ul>
<u>Week of</u> Jul 09 – Jul 15	Module 8	<u>Sequential Logic:</u> <ul style="list-style-type: none"> <li>• Applications of Sequential Elements</li> <li>• Introduction to state machines</li> </ul>	<ul style="list-style-type: none"> <li>• Read Chapter 3.6 - 3.7</li> <li>• Review Lecture Presentations</li> <li>• Practice Self Review #8</li> <li>• Bb Discussion #4 - <b>End</b></li> <li>• <b>Propose teams</b></li> <li>• HW 4 – <b>Out</b></li> <li>• Programming Problem 2 <b>Due</b></li> </ul>
<u>Week of</u> Jul 16 – Jul 22	Module 9	<u>Structure of CPU:</u> <ul style="list-style-type: none"> <li>• CPU &amp; Address Path</li> <li>• Simulating CPU</li> <li>• Random Logic Control Unit</li> <li>• Micro programmed Control Unit</li> </ul>	<ul style="list-style-type: none"> <li>• Read Chapter 7</li> <li>• Review Lecture Presentations</li> <li>• Practice Self Review #9</li> <li>• HW 4 – <b>Due</b></li> <li>• Essay – <b>Due</b></li> </ul>
<u>Week of</u> Jul 23 – Jul 29	<b>Final Exams</b>	• End of Course	• Course Evaluation

## STUDENT EVALUATION

The course has (4) Four Blackboard Discussions, (4) Four Homework, (1) One Essay, (2) Two Programming Assignments, and a Final. Letter grades are awarded based on the total number of points achieved. Points are deducted for late assignments.

Assignments	Total Points	Weight
4 Online Discussions – (60 pts each)	240	24%
4 Homework – (60 pts each)	240	24%
1 Essay	120	12%
2 Programming Problems – (100 pts each)	200	20%
1 Final Exam	200	20%
<b>Total Points</b>	<b>1000</b>	<b>100%</b>

Class Points	Letter Grade
96% and above	A
90% – 95.99%	A-
87% – 89.99%	B+
83% – 86.99%	B
80% – 82.99%	B-

77% – 79.99%	C+
73% – 76.99%	C
70% – 72.99%	C-
61% – 70.99%	D (Undergrad Only)
60.99% and below	E

**Note: Grades lower than a “B” fall below the LTU graduate standard**

## EDUCATIONAL GOALS

*Computer Architecture and programming Language course focuses on the fundamental of computer structure, architecture, and programming that underpin the array of computerized technologies.*

Typical topics include: Digital computers; Gates; Circuits & Combinational Logic; Sequential Logic; Computer Arithmetic; Instruction Set Architecture; Assembly Language Programming; Structure of the CPU; RISC Architecture & Pipelining; MISD & MIMD Architectures; Processor & Memory Architecture, and case studies.

## STUDENT LEARNING OBJECTIVES / OUTCOMES

Upon successful completion of *Computer Architecture and programming course*, student will be able to:

1. Describe the basic set of logic elements used to create digital systems.
2. Converting problems in words into a logical expressions and digital circuits.
3. Design and implement digital circuits and examine their behavior using Digital Works software tools.
4. Construct sequential circuits using flip-flops to build counter and shift registers.
5. Interpret numerical and alphanumeric data represented inside digital computer.
6. Describe CPU core components and its native Instruction Set Architecture (ISA)
7. Construct programs using Assembly Language to run on the 68K processor ISA.
8. Explain how a computer system works at the level of internal information flow
9. Show how a computer converts an instruction Op-code into the actions that implement the op-code.
10. Demonstrate how a computer is organized internally and how it reads instructions from memory, decodes them, and executes them.
11. Examine different techniques used to make the computer systems operate faster; including CICS, RISC MISD, MIMD architectures and Pipelining.

## PREREQUISITE SKILLS

- Student must be able to write computer programs in C, C++, or Java
- Student must be willing and able to use MS Visual Studio C++ 2008 or 2010 for programming assignments.

## INSTRUCTIONAL METHODS AND COURSE ORGANIZATION

**Blackboard Learning Environment** – Blackboard at my.ltu.edu contains the syllabus, all assignments, reading materials, streaming videos, narrated PowerPoint mini-lectures, podcasts, written lecture notes, chapter quizzes, links to Web resources, and discussion forums. You will submit all assignments via Blackboard, and are expected to participate regularly in discussion topics. Please take time to familiarize yourself with the organization of the Blackboard site. You will want to check the site frequently for announcements reminding you of new resources and upcoming assignments.

**Student/Instructor Conversations** – Students keep in touch with the instructor via e-mail messages, telephone conference calls, and IM conversations.

**Self-Assessments** – Pre- and post- self-assessment tools will help students measure their entering skills and progress during the course.

**Required Reading** – Textbook chapters should be read according to the schedule outlined in the syllabus. Chapters will be discussed online.

**Publisher Web Site** – A publisher web site at <http://www.wiley.com/college/silberschatz> includes instructional materials, PowerPoint slides, case studies, application exercises, and practice quizzes. You should make use of as many of these resources as you need to be successful.

**Assignments** – For each module, assignments will be posted on the Blackboard with due dates.

## CLASS POLICIES AND EXPECTATIONS

*I plan to offer you a valuable learning experience, and expect us to work together to achieve this goal. Here are some general expectations regarding this course:*

- Each student has a LTU email account. If you wish to use a different email address for this course, please **change your email address in Blackboard under “Blackboard Tools”, then “Personal Information”** and send an email to me to store your email address in my directory.
- Readings, discussion forum participation, and written assignments must be completed according to the class schedule. It is important to contact the instructor as needed to discuss personal needs regarding course requirements and assignments.
- It is essential that all students actively contribute to the course objectives through their experiences and working knowledge.
- All assignments must be submitted on schedule, via Blackboard, and using Microsoft Office compatible software. If you need to submit an assignment via email, contact the instructor in advance.
- Assignments must be completed to an adequate standard to obtain a passing grade. Requirements for each assignment are detailed in this syllabus.
- Be prepared to log into Blackboard at least once each day. Please focus your online correspondence within the appropriate Blackboard discussion forums, so that your colleagues may learn from you.
- At midterm and at the end of the course, you will be invited to participate in a University evaluation of this course. Your feedback is important to the University, to LTU Online, and to me as an instructor, and I strongly encourage your participation in the evaluation process.

### **It is important for you as students to know what to expect from me as your instructor:**

- I will be available to you via e-mail, Wimba classroom, phone and will promptly reply to your messages.
- I will maintain the Blackboard web site with current materials, and will resolve any content-related problems promptly as they are reported to me.
- I will send out a weekly e-mail update to all class members to guide upcoming work and remind you of assignment due dates.
- I will return all assignments to you promptly, and will include individualized comments and suggestions with each assignment.
- I will hold our personal written or verbal communications in confidence. I will not post any of your assignments for viewing by the class without requesting your approval in advance.

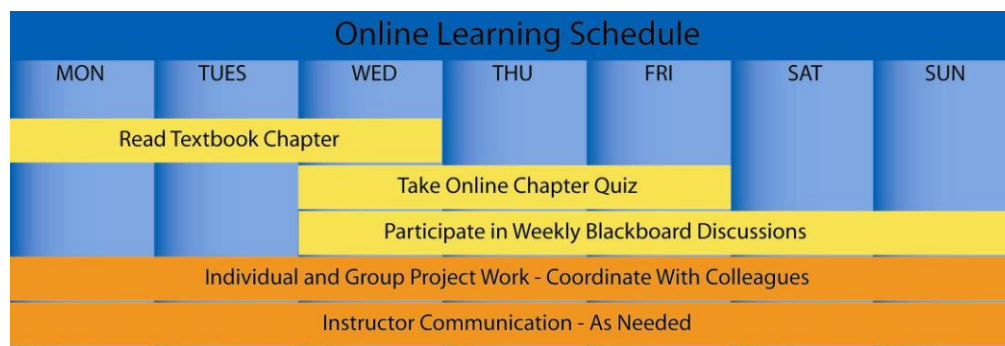

- I will treat all members of the class fairly, and will do my best to accommodate individual learning styles and special needs.
- If any of these points need clarification, or should special circumstances arise that require my assistance, please contact me so that we may discuss and resolve the matter.

## PRACTICAL GUIDELINES FOR CLASS LOAD EXPECTATIONS

A three-credit course generally requires 10-12 hours per week of time commitment. Here are some practical guidelines to help schedule your time commitments for this online course:

- A 14-week semester (the Summer semester is compressed into 10 weeks) would require at least 140 hours of time commitment to successfully complete all readings, activities, assignments, and texts as described in this syllabus.
- You should reserve at least 6 hours per week to read the required textbook chapters and resources, participate in online discussions, review presentation materials, and work through online quizzes. This effort will total at least 84 hours over the course of the semester.
- You should organize your remaining time to roughly correspond with the point value of each major assignment. This means that you should plan to spend at least:
  - 8-9 hours preparing your case study review;
  - 24-40 hours working with your group on the three parts of your semester-long project;
  - 8-9 hours working on the various components of your reflective consolidation (final exam).

These guidelines may not reflect the actual amount of outside time that you – as a unique individual with your own learning style – will need to complete the course requirements. The number of hours each week will vary based on assignment due dates, so please plan ahead to insure that you schedule your academic, work, and personal time effectively. The following graphic may be used to guide you in planning your weekly course work to remain on schedule:

## ASSIGNMENT DETAILS

Course assignments and evaluation criteria are detailed below. Please review these requirements carefully. See the section Academic Resources / Assessment Guidelines for information about assessment of written and oral presentations.

Details for all assignments are shown below. Please note that you should not submit any assignments to the Blackboard "Digital Drop Box." All assignments are submitted using the Blackboard "Assignments" or "SafeAssign" function. Some assignments are also posted to the Blackboard Discussion Forum for student comments.

## Assignments

### Overview

This course features several Self-Review Exercises, Class Discussion, and Teamwork/Essay/Case Study, Homework, and Programming Problems/Projects activities.

### Self-Review Exercises:

Each module contains self-review exercise that addresses important operating systems concepts. These exercises are ungraded activities; they are designed to enable you to test your knowledge, get immediate feedback and gauge your understanding of material. These exercises also help prepare you for the quizzes and exams. Some of the self-review exercises cannot be answered only from the material presented in their corresponding modules; these are additional teaching and learning opportunities.

### Class Discussions:

- Class discussions are a fundamental part of individual student work (other individual work might include worksheets, essays, web assignments, etc.).
- Class discussions are intended to mimic discussions that take place in a brick and mortar classroom. Therefore, students are almost always expected to post a substantial initial response and to reply to contributions from other students and the instructor.
- **Your post and responses must be substantial and innovative contribution to the discussion**
- The minimum expectation for each Class Discussion is to post one quality Main Post and at least two quality-responses to others (others include your classmates and/or me).
- I will read each of your posts in these areas and will provide you with open-ended/ exploratory/ expanding responses.
- It's important that you to participate in each Class Discussion and Teamwork forum. Always proofread and spell check your posts.
- There will be four (4) Bb discussions in the area of operating system.
- Each Class Discussion assignment is worth a total of 60 points (6% of the final grade). Earn up to 30 points for each initial post and up to 15 points for each response, depending on quality).

### Teamwork/Essay/Case Study:

- **Your Essay must be substantial and innovative contribution**
- Essays must be formatted according to APA Document formatting protocol and organized according to "How to Organize your Essay" document (listed under Course Information.)
- There will be one teamwork/Essay/Case Study activity in the area of operating systems.
- Teamwork/Essay/Case Study assignment is worth a total of 120 points (12% of the final grade.) Earn up to 60 points for your participation/effort and up to 60 points for the deliverable (composition of your document and PowerPoint developed by you and/or your team, depending on quality).

### Programming Assignments:

- Emphasize the concepts presented in the course using Assembly Language
- There will be 2 programming Assignments.
- Each programming assignment is worth of total of 100 points (10% of the final grade)

### **Programming Assignments:**

- Emphasize the concepts presented in the course using Assembly Languages.
- There will be 2 Programming Assignments.
- Each programming assignment is worth 100 points (10% of the final grade)

### **Due Dates**

- Teamwork/Essay/case study Activity appears in **Week 1** and due in **Week 9**.
- Homework Assignments:

Homework	Published Date	Due Date	Grade Points
Homework 1	5/28/2012	6/10/2012	60 pts (6%)
Homework 2	6/11/2012	6/24/2012	60 pts (6%)
Homework 3	6/25/2012	7/08/2012	60 pts (6%)
Homework 4	7/09/2012	7/22/2012	60 pts (6%)

- Programming Assignments:

Programming Assignment	Published Date	Due Date	Grade Points
First Program	6/18/2012	7/01/2012	60 pts (6%)
Second Program	7/02/2012	7/15/2012	60 pts (6%)

### **Deliverables and Evaluation:**

- Essays must be formatted according to APA Document formatting protocol and organized according to "How to Organize your Essay" document (listed under Course Information.)
- Teamwork/Essays/case studies are submitted via Bb. Word, Excel or Journal format is preferred; however I will accept text (txt, rtf).
- Programming Problem assignments are submitted by zipping the Visual Studio project folder (after deleting the debug folder) and submitting via Bb assignments.

### **SYLLABUS ADDENDA**

Please see the LTU Online "Current Students" web site <http://www.ltu.edu/ltuonline/> for comprehensive information about Lawrence Tech's academic services, library services, student services, and academic integrity standards. The content of this web site is explicitly included in these syllabus requirements.

The LTU Online "Current Students" web site also includes grading rubrics used by your instructor to evaluate written assignments, discussion forum participation, and group assignments. Please note that the SafeAssign anti-plagiarism product will be used for written assignments submitted for this course. Please see the instructions included on the [eHelp web site](#) regarding the use of the SafeAssign product.

### **Undergraduates: Leadership Transcripts**

The leadership transcript enables students to track co-curricular activities that are undertaken above and beyond the requirements of the LTU curriculum. The leadership transcript serves students by enhancing the leadership portfolio; providing the opportunity for a transcript of distinction; enhancing their resumes;

and assisting in articulating leadership experience. It can be accessed by logging on to Banner Web and clicking the Student and Financial Aid tab. Leadership Activities is located at the bottom of the list.
